Authorised Manager – Risk & Information Security - bitFlyer Europe S.A

SALARY

€180K - €250K

LOCATION

Luxembourg (Office)

Description

Description

bitFlyer Europe is seeking an **Authorised Manager** mainly responsible for **Risk Management, Internal Control and Information Security**. The role is based in Luxembourg and forms part of the company's **senior managemen**t.

The Authorised Manager will be accountable for the **design, implementation, oversight and effectiveness** of the firm's risk management framework, internal control system and ICT / information security governance, in line with **MiCA/MiFID** requirements and applicable EU regulations, including **DORA**.

The role is hands-on, with no dedicated Risk or Information Security team, and includes overall managerial responsibility for the firm as one of the Authorised Managers, together with the other Authorised Manager.

In this capacity, the role provides senior management oversight and coordination across all functions, including Risk and Compliance, while fully respecting the functional independence of the Compliance function.

Tasks and Responsibilities

1. Authorised Manager Responsibilities

    Act as Authorised Manager vis-à-vis the regulator for Risk, Internal Control and Information Security matters

    Ensure the sound, prudent and compliant operation of the firm in coordination with the other Authorised Manager(s)

    Contribute to defining the strategy and development plan of bitFlyer Europe

    Represent bitFlyer Europe in internal and external meetings, including with regulators, auditors and other stakeholders

    Liaise with regulatory authorities, external auditors, service providers and vendors as required

    Coordinate with global group functions to ensure alignment and consistency of approach

2. Authorised Manager – Functional Oversight

As one of the Authorised Managers, hold overall senior management responsibility for the firm, with functional oversight of: Risk Management and Internal Control, Compliance, IT and Information Security, HR and Administration.

Ensure that these functions operate effectively and in alignment with the firm's governance framework, strategy and regulatory obligations.

With respect to Compliance, provide senior management oversight and coordination while fully respecting its functional and operational independence, and act as a senior management point of escalation for the Head of Compliance.

3. Risk Management & Internal Control

Develop, maintain and enhance the risk management framework, policies and procedures, including: Risk identification and risk universe, Risk appetite framework, Risk assessment and monitoring, Risk reporting and Key Risk Indicators (KRIs),

Cover the full risk universe, including but not limited to: Operational risk, ICT and information security risk, Credit risk, Market and FX risk, Liquidity risk, Reputational risk,

Identify, assess and monitor material risks and ensure appropriate mitigating controls are in place

Review, document and evaluate the internal control framework, including automated and manual controls

Identify gaps or weaknesses in the risk and control framework and ensure remediation aligned with regulatory expectations and industry standards

Prepare and present risk and internal control reporting to senior management and Boards

Oversee outsourcing and third-party risk, including methodology and ongoing monitoring

4. Information Security, ICT Risk & DORA

Act as senior accountable person for ICT risk management and information security governance

Define, maintain and review: Information security policy, ICT-related policies and procedures, Incident management and escalation frameworks.

Ensure compliance with DORA and other applicable ICT / information security regulatory requirements

Perform and coordinate ICT and information security risk assessments

Oversee ICT controls across the full system lifecycle

Monitor security vulnerabilities, incidents and emerging threats, and ensure appropriate mitigation

Oversee third-party IT service providers, including SLAs and security requirements

Coordinate ICT-related regulatory reporting and audits in collaboration with Compliance.

Requirements

Education

University degree in risk management, finance, accounting, law, IT or related field

Risk or control qualification (e.g. FRM) or equivalent professional experience is an asset

Experience / knowledge

Minimum 5 years of experience in a senior Risk, Internal Control, Compliance or related function within a regulated financial institution,

Strong experience in risk management within a MiFID-regulated firm,

Solid and practical knowledge of: Information security and ICT risk, DORA regulatory framework.

Good understanding of finance and accounting, including: Financial statements, Capital and prudential considerations, Financial and operational controls.

Experience working with regulators, auditors and senior management,

Ability to operate effectively in a hands-on role without a dedicated team,

Experience in multicultural and international environments,

Exposure to or interest in crypto / blockchain is an asset, but not a prerequisite.

Key competences

Strong judgment and decision-making capability at senior management level,

Ability to combine strategic oversight with operational execution,

Clear communication and stakeholder management skills,

Independence of mind and ability to challenge constructively,

High level of integrity and regulatory awareness.

Languages

Fluent in English (oral/written),

Other European languages or Japanese language are a plus.
